

Flow indicator (Double window sight glasses)

PN16 / PN40

- with flanges (Fig. 660....1)
- with screwed sockets (Fig. 660....2)
- with butt weld ends (Fig. 660....4)

Grey cast iron
Cast steel
Stainless steel

Fig. 660

Page 2

Fig. 660....1

Features:

- with double sided window (borosilicate glass)
- Sight glasses with reinforced windows acc. to DIN 3237
- Mounting in any position
- Robust and water hammer proof design

Flow indicator (Grey cast iron, Cast steel, Stainless steel)

Fig. 660....1 with flanges

Fig. 660....2 with screwed sockets

Fig. 660....4 with butt weld ends

Figure	Nominal pressure	Material	Nominal diameter / NPS	Operating pressure PS	Inlet temperature TS	max. pH value
12.660	PN16	EN-JL1040	6 - 200 / 1/4" - 8"	16 barg	120 °C	9-10
				10,2 barg	280 °C	
32.660	PN16	1.0619+N	6 - 200 / 1/4" - 8"	16 barg	120 °C	
				10,2 barg	280 °C	
52.660	PN16	1.4408	6 - 200 / 1/4" - 8"	16 barg	120 °C	
				10,2 barg	280 °C	
35.660	PN40	1.0619+N	6 - 200 / 1/4" - 8"	40 barg	120 °C	
				28 barg	280 °C	
55.660	PN40	1.4408	6 - 200 / 1/4" - 8"	40 barg	120 °C	
				28 barg	280 °C	

For ANSI versions refer to data sheet CONA®Komponenten-ANSI

Types of connection

Other types of connection on request.

- Flanges1 _____ acc. to DIN 2533 or DIN EN 1092-2 (PN16) / DIN 2635 or DIN EN 1092-1 (PN40)
- Screwed sockets2 _____ Rp thread acc. to DIN EN 10226-1 or NPT thread acc. to ANSI B1.20.1
- Butt weld ends4 _____ Weld preparation acc. to EN ISO 9692 identification No. 1.3 and 1.5 (Note restriction on operating pressure / inlet temperature depending to design!)

Features

- Double window sight glasses in straight through (borosilicate glass)
- Sight glasses provide visual indication of the flow through pipe works and monitoring of the system.
- In connection with steam traps they will allow the monitoring of the function of steam traps
- Installation in any position. In connection with the steam trap the sight glass has to be installed in front of it.
- **Construction acc. to DIN 3237 Sight glasses with reinforced windows**

Selection criteria

- Operating pressure
- Operating temperature
- Nominal diameter / pressure
- Type of connection
- Body material

Example for order data

For monitoring the function of steam traps in pipe work systems, PS = 22bar, TS = 250°C, Screwed sockets G1/2, Body stainless steel, Window borosilicate glass DIN 7080-16.
=> **Flow indicator, Fig. 660, G 1/2, PN16, Stainless steel, Face-to-face dimension 100 mm, Screwed sockets.**

Information / restriction of technical rules need to be observed!

Resistance and fitness must be verified (contact manufacturer for information, refer to Product overview and Resistance list).

Operating and installation instructions can be downloaded at www.ari-armaturen.com.

Flow conditions through a sight glass installed in front of a steam trap

Figure 1: Back pressure of condensate
On a back pressure of condensate the interior space will be filled with liquid.

Figure 2: Steam flow
On steam flow the liquid level is lowered below the edge of the inlet pipe. Intensive mixture of water and steam can lead to an intensive bubbling.

Figure 3: Tetragonal top flange (< DN 65)

Figure 4: Circular top flange (DN65-250)

Informations about pipe welding

Welding groove acc. to DIN 2559

The material used for ARI valves with butt weld ends are: 1.0619+N GP240GH+N acc. to DIN EN 10213-2

Note: 1.4408 GX5CrNiMo19-11-2 acc. to DIN EN 10213-4

Note restriction on operating pressure / inlet temperature depending to design!

Due to our experience, we recommend to apply an electric welding process.

Because of the different material compositions and wall thickness of the steam traps and the pipe gas welding shall not be applied. Quenching cracks and coarse grain structure may develop.

On bimetallic steam traps face-to-face of 95 mm or less, the bimetallic controller has to be disassembled prior to welding. After the traps have cooled down to the ambient temperature the bimetallic controller shall be fitted again into the body.

Steam traps with socket-weld ends shall only be welded by arc welding (welding process 111 acc. to DIN EN 24063).

If during the time of warranty others than the manufacturer or by the manufacturer authorized persons are interfering in the product and/or the setting, the right of claim for warranty will lapse!
